## DEAR CUSTOMER,

---

*WE ARE PLEASED TO INFORM YOU THAT PRÄWEST IS INVESTING IN NEW PRODUCTION TECHNOLOGY:*

As of the beginning of July 2015, we will be offering our customers laser sintering (3D-printing) of metallic materials. With this significant addition to our range, we will be able to produce a wide range of different articles on an even more flexible and individual basis. This is a logical step forward allowing us to economically implement complex geometries in different metals.

We trust that this has aroused your interest and will be happy to hold talks with you and to provide you with demonstrations at our company.

Yours sincerely,

Gaylord Klammt  
(Head of Department Industry)

Reiner Wahlers &  
Dr. Benjamin O'Shea  
(Managing Director)
